Wabbi Named to CIOReview's 20 Most Promising DevOps Companies of 2020
Recognized for delivering AppSec in DevOps without sacrificing agility

Boston – June 16, 2020 – Wabbi, a SecDevOps orchestration platform, announced today that it has been named to CIOReview's annual list of Most Promising DevOps Companies. A distinguished panel of CEOs, analysts and CIOs produce the annual list to recognize powerful yet innovative solutions in the field of development and operations. Wabbi joins the ranks of prestigious innovators previously honored including CloudBees, JFrog and Splunk.

"As our mission is to make Application Security a routine part of DevOps, it's great to be recognized for our role in the evolution of DevOps," said Brittany Greenfield, Founder & CEO, Wabbi. "Just as the increased demand for efficiency and speed in the pipeline paved the way for DevOps, so has it for SecDevOps, which enables the integration of AppSec into existing Development pipelines to reduce security risk without sacrificing agility or velocity."

Wabbi's platform has pioneered delivering SecDevOps in the modern Software Development pipeline by automating Application Security processes to break down data silos and deliver actionable information throughout the SDLC. Wabbi's proprietary project profile creates a custom project-level algorithm based on its attributes to assign policies, prioritize security issues and manage governance. From cutting-edge software startups to leaders of industry, enterprises de-risk project delivery, increase Developer productivity and amplify the ROI of existing AppSec programs with Wabbi's SecDevOps platform.

"We are glad to announce Wabbi as one of the 20 Most Promising DevOps Solution Providers of 2020," said Justin Smith, Managing Editor, CIOReview. "This recognition is a testament to the focus of Wabbi on decentralizing the management of AppSec and enabling development teams to own the day-to-day execution and capture the productivity benefits of implementing security throughout the development lifecycle."
